No 911 Outage	No 911 Outages	No 911 Outages

Service Interruptions:

- None reported.

Remote/Community Isolations:

- None reported.

WEATHER OF CONCERN

Weather of Concern

- A wet and cold pattern will continue for portions of Northern California. Rain is expected in the San Joaquin Valley and Foothills and the Sierra Nevada will also see periods of snow in through Saturday. In addition to the snow, winds are also expected to gust between 20 to 30 miles per hour which could cause possible periods of whiteout conditions.
- There will be a series of weak wet weather systems rotating through Southern California bringing strong winds to the mountains and high desert through the weekend. Storm total rainfall amounts now expected to range between 0.50 and 1.50 inches across much of San Luis Obispo County, except 1.5 to 2.5 inches for foothill and northern coastal areas, including the Chimney Burn area. Rainfall amounts across Santa Barbara county are generally expected to range between 0.10 and 0.50 inches.

Active Weather Warnings, Watches and Advisories by County:

WEATHER SYNOPSIS BY REGION

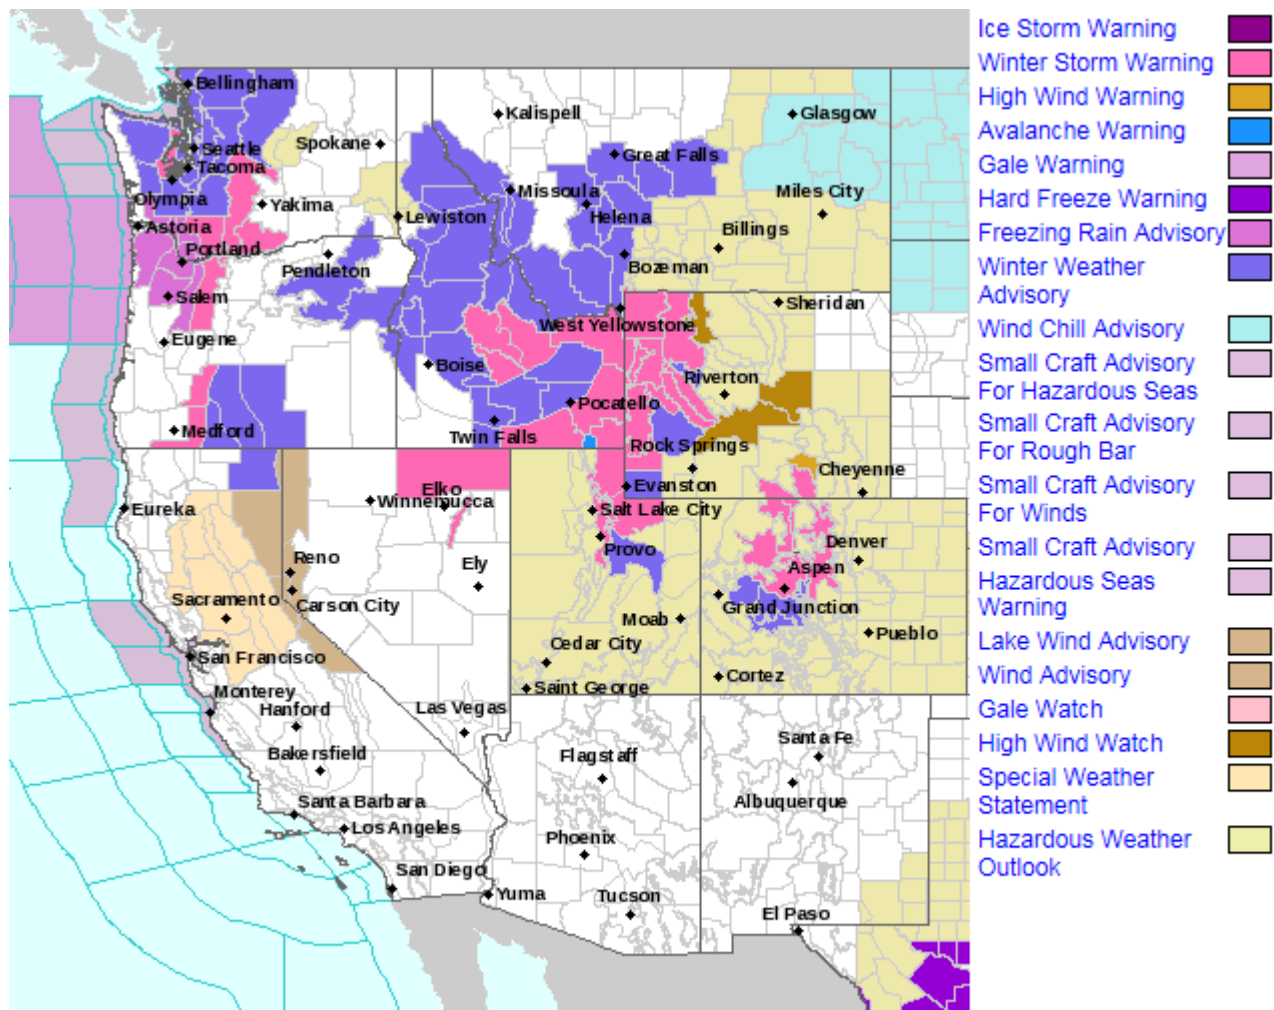

NORTHERN CALIFORNIA

While there continues to be quite a bit of uncertainty about the timing and strength of any weather systems that will move through Northern California during the next 7 days, the end result will be moist conditions for the region in spite of that. Snow levels were quite low overnight, but have already begun to rise. Areas of gusty South to West winds are also expected today over the mountains, then become a bit more widespread today. It appears showery conditions will continue into the weekend, but there may be a significant break between systems Sunday when it will be rather dry. Another series of weather systems is expected to return early next week. Snow levels will be on the rise today and pretty much stay no lower than 5000 feet in the north and 6500 feet in the south after today.

SOUTHERN CALIFORNIA

Zonal flow will bring showers to Central California at times through the middle of next week. Most locations from a Monterey/Fresno County line northward will receive 1 to 4 inches of rainfall, while less than an inch of rainfall is expected to the south of this line through the middle of next week. The snow level will be between 8,000 and 9,000 feet across the Sierra. Little or no rainfall is expected across Southern California through the middle of next week. Westerly winds of 20 to 30 mph with gusts to 50 mph will surface across the mountain ridges and desert passes tomorrow afternoon through the middle of next week. Maximum temperatures will be near normal through the middle of next week, with mid 40s to mid 50s across the mountains and 60s to low 70s in the valleys. Minimum humidity will be above 30% through the middle of next week.
